Temporary Storage Container Guidelines

Temporary storage containers (ex. POD's) are permitted with the following conditions:

- Property manager/HOA must be notified about the container, reason for its need and planned timeframe
- Container must be placed in the driveway in a manner that does not block the sidewalk or encroach on any right of way (per City code)
- Placement may be for a period of three months. Time extensions will be considered on an individual basis, based on reason for need.
